

LECTURE 13 • PSM-28 • 2 H

Effective Management for Securing Port Facilities

Purpose. Strengthen governance, law-enforcement interfaces, suspicious-activity management, information sharing, business cases, committees and partnership assurance.

Learning outcomes supported. 2, 4, 5, 6, 9 and 10

Suggested time plan: Read and annotate 25 min | Research and collect evidence 35 min | Create the required output 50 min | Review 10 min | Total 2 h

Research questions

1. How do port-security and law-enforcement responsibilities differ and complement each other?
2. How should suspicious behaviour be described and escalated without stereotyping?
3. What makes a security committee or partnership demonstrably effective?

Independent-learning activity

4. Write a behaviour-based suspicious-activity report for a fictional scenario, clearly separating observation from inference.
5. Create an escalation flow covering immediate safety, facility control, PFSO review, police contact and evidence protection.
6. Draft a one-page partnership charter defining purpose, roles, information rules, meeting rhythm, decisions and action closure.
7. Add four assurance indicators for readiness, response, partner performance and improvement.
